## chaperone-mediated protein folding

antigen processing and presentation of endogenous peptide antigen via MHC class I antigen processing and presentation of endogenous antigen protein refolding antigen processing arantigen processing and presentation of peptide antigen

antigen processing and presentation of peptide antigen via MHC class I antigen processing and presentation of exogenous antigen

regulation of innate immune response regulation of response to biotic stimulus

positive regulation of defense response positive regulation of blood vessel endothelial cell migration positive regulation of innate immune response

positive regulation of response to biotic stimulus regulation of muscle cell differentiation regulation of striated muscle cell differentiation regulation of striated muscle cell differentiation.

muscle cell differentiation of glial cell apoptotic process muscle organ development striated muscle tissue development muscle tissue development

cardiac muscle tissue development heart contraction

muscle system process

heart process regulation of heart contraction
